# Mouse Anti-Acetyl-Histone H3 (Lys18)

| Cat. No. | Format          | Size   |
|----------|-----------------|--------|
| 13300-01 | Purified (UNLB) | 0.1 mg |

Paraffin embedded human gastric cancer tissue was stained with Mouse Anti-Acetyl-Histone H3 (Lys18)-UNLB (SB Cat. No. 13300-01) followed by Goat Anti-Mouse IgG, Human ads-BIOT (SB Cat. No. 1030-08), Streptavidin-HRP (SB Cat. No. 7100-05), DAB, and hematoxylin.

### **Overview**

SB157a Clone

Isotype Mouse (BALB/c) IgG<sub>1</sub>κ

Synthetic peptide designed based on the region around Lysine 18 of human H3 sequence **Immunogen** 

**Specificity** Human H3 acetylated at Lysine 18, Mr 17 kDa

Alternate Name(s) H3K18ac

#### **Description**

Nucleosomes are the fundamental repeating subunit of chromatin and are the basic units of DNA packaging in eukaryotes. Nucleosomes consist of 147 base pairs of DNA wrapped around a histone octamer composed of pairs of each of the four core histones (H2A, H2B, H3, and H4). Histones consist of a globular domain and a more flexible amino terminus (histone "tail") which may undergo various post-translational modifications, including acetylation, phosphorylation, and methylation. These modifications have a direct effect on chromatin structure and chromatin protein interactions, and are involved in DNA repair, chromosome condensation, and gene regulation.

#### **Applications**

ELISA - Quality tested WB IHC-PS 1 **ICC** FC<sup>1</sup>

## **Working Dilutions**

| ELISA                | Purified (UNLB) antibody   | ≤ 1 μg/mL           |
|----------------------|--|---------------------|
| Immunoblotting       | Purified (UNLB) antibody   | ≤ 1 μg/mL           |
| Immunocytochemistry  | Purified (UNLB) antibody   | ≤ 1 μg/mL           |
| Immunohistochemistry | Purified (UNLB) antibody   | $\leq$ 5 $\mu$ g/mL |
| Flow Cytometry       | Purified (UNLB) antibody $$\leq 1~\mu g/10^6$$ cells For flow cytometry, the suggested use of these reagents is in a final volume of 100 $\mu L$ |                     |
| Other Applications   | Since applications vary, you should determine the optimum working dilution for the product that is appropriate for your specific need.           |                     |

For Research Use Only. Not for Diagnostic or Therapeutic Use.

# **Handling and Storage**

- The purified (UNLB) antibody is supplied as 0.1 mg of purified immunoglobulin in 0.2 mL of borate buffered saline, pH 8.2, containing 30% glycerol and 0.01% BSA. Store at -20°C.
- Reagent is stable for the period shown on the label if stored as directed.
