**Overview**

Clone: 17-3-3 (17-3-3S)

Isotype: Mouse (C3H.SW) IgG2a\(\kappa\)

Immunogen: C3H mouse skin graft and splenocytes

Specificity: Mouse I-E\(^k\)

Alternate Name(s): MHC Class II

**Description**

The monoclonal antibody 17-3-3 reacts with the I-E\(^k\) class II alloantigen on cells from mice of the H-2\(^r\) haplotype. Reactivity with H-2\(^d\) and H-2\(^p\) haplotypes has not been observed. Cells from mice of the H-2\(^o\), H-2\(^f\), H-2\(^g\), H-2\(^q\), and H-2\(^s\) haplotypes do not express I-E antigen.

**Applications**

- FC – Quality tested \(^3\)
- IHC-FS – Reported in literature \(^2\)
- CMCD – Reported in literature \(^1\)

**Working Dilutions**

Flow Cytometry:
- FITC and BIOT conjugates: \(\leq 1 \mu g/10^6\) cells
- PE conjugate: \(\leq 0.2 \mu g/10^6\) cells

For flow cytometry, the suggested use of these reagents is in a final volume of 100 \(\mu\)L

**Other Applications**

Since applications vary, you should determine the optimum working dilution for the product that is appropriate for your specific need.
Handling and Storage

- The purified (UNLB) antibody is supplied as 0.5 mg of purified immunoglobulin in 1.0 mL of borate buffered saline, pH 8.2. **No preservatives or amine-containing buffer salts added.** Store at 2-8°C.
- The fluorescein (FITC) conjugate is supplied as 0.5 mg in 1.0 mL of PBS/NaN₃. Store at 2-8°C.
- The biotin (BIOT) conjugate is supplied as 0.5 mg in 1.0 mL of PBS/NaN₃. Store at 2-8°C.
- The R-phycoerythrin (PE) conjugate is supplied as 0.1 mg in 1.0 mL of PBS/NaN₃ and a stabilizing agent. Store at 2-8°C. **Do not freeze!**
- Protect fluorochrome-conjugated forms from light. Reagents are stable for the period shown on the label if stored as directed.

Warning

Some reagents contain sodium azide. Please refer to product specific (M)SDS.
