Description

Specificity: Reacts with the heavy and light chains of feline IgG
Source: Pooled antisera from goats hyperimmunized with feline IgG
Cross Adsorption: None; may react with immunoglobulins from other species and the light chains of other feline immunoglobulins
Purification: Affinity chromatography on feline IgG covalently linked to agarose

Applications

Quality tested applications include –
ELISA 1-4
FLISA

Other referenced applications include –
FC 5,6
IP 7
WB 8

Working Dilutions

ELISA
- AP conjugate 1:2,000 – 1:4,000
- HRP conjugate 1:4,000 – 1:8,000

FLISA
- FITC conjugate 1:200 – 1:400

Other Applications
Since applications vary, you should determine the optimum working dilution for the product that is appropriate for your specific need.
Handling and Storage

- The purified (UNLB) antibody is supplied as 1.0 mg purified immunoglobulin in 1.0 mL of borate buffered saline, pH 8.2. No preservatives or amine-containing buffer salts added. Store at 2-8°C.
- The fluorescein (FITC) conjugate is supplied as 1.0 mg in 1.0 mL of PBS/NaN3. Store at 2-8°C.
- The alkaline phosphatase (AP) conjugate is supplied as 1.0 mL in a stock solution of 50 mM Tris/1 mM MgCl₂/50% glycerol, pH 8.0, containing NaN₃ as preservative. Store at 2-8°C or long-term at -20°C.
- The horseradish peroxidase (HRP) conjugate is supplied as 1.0 mL in a stock solution of 50% glycerol/50% PBS, pH 7.4. No preservative added. Store at 2-8°C or long-term at -20°C.
- Protect fluorochrome-conjugated forms from light. Reagents are stable for the period shown on the label if stored as directed.

Warning

Some reagents contain sodium azide. Please refer to product specific SDS.
